

## **Gleiberson David Abramovich**

Candidate of Agricultural Sciences. Direction of work - development of technology and system of anti-erosion machines. These include a complex of machines for mechanizing the processes of accumulation of moisture in the soil due to winter precipitation. This snow-swath-swath generator SVU-2,6, rocker seeder KSP-2, lunkyobrazovatel LOD-10. For tillage and sowing, we developed: KPP-2,2 cultivators-flat cutters for shallow tillage with soil stubble left on the surface; sowing-cultivators for work on stubble backgrounds.
