

Golikov Vladimir Andreevich

Doctor of Technical Sciences, Professor, Academician of the National Academy of Sciences of the Republic of Kazakhstan. At present, he is the Chief Scientific Officer of the Laboratory of Systems of Technologies and Machines in Agriculture.

He is the founder of the scientific school in the republic for the technological design of production lines for the preparation of fodder for cattle-breeding complexes. On the basis of theoretical and experimental research, under his scientific guidance and direct participation, a high-performance feeder for feeding grain to the combine, sets of machines and equipment for the preparation of feeds, widely introduced into agricultural production, have been developed. With his guidance, 5 books on machine systems for various branches of the agro-industrial complex of the republic were prepared and published. He has published more than 200 scientific papers, incl. 7 books, has more than 20 copyright certificates and patents, prepared 1 doctor and 11 candidates of science.

He was awarded with a diploma, a silver medal of the Exhibition of Economic Achievements of the USSR, a diploma of the 2-nd degree of VDNH of the Kazakh SSR.
