

Lokshin Anatoly Leonidovich

Candidate of Technical Sciences. I worked at the institute for 30 years. He worked as a researcher at the laboratory for harvesting grain crops and then as director of the experimental plant of the Institute. Has made a significant contribution to improving the technology of harvesting rice. As the director of the pilot plant, the plant produced: PRF-750 round baler; seeders for crops and for sowing desert grasses; reversible plows; tillage machines - cultivators and flat cutters.
